

Bam Bahadur Pun

Frontend developer HTML | CSS | JavaScript | React

bampun23@gmail.com | (984) 3464609

Website: <https://bampun.com.np/>

Professional Summary:

Extensive 5+ years of experience in the tech industry with referable & strong knowledge in the design & development of web applications using HTML5, CSS3, Bootstrap, JavaScript, ES6, React.JS jQuery and WordPress.

Built SPA (Single Page Applications) using reusable and customized React.js Components, react routes, and working with Life-cycle hooks and React-Redux architecture

Good experience on React.js with Reactive-search, search-kit, and search-UI components which are integrated with elastic search.

Proficient with JavaScript (ES6) Event handling, Asynchronous process with Promise, Callback functions, Closure, Prototype inheritance, and DOM manipulation.

Created Single page applications with React using Hooks, redux for stateful management; or using previous React state object plus lifecycle for components internalize stateful management.

Used React.JS to create views to hook up models to the DOM and synchronize data with the server as a Single Page Application (SPA).

Hands-on experience using the version control tools like GIT and project management tools like JIRA.
